

Passwordless authentication, backed by Zero Trust

Secure Your Business

Current authentication methods such as passwords, MFA, and one-time biometrics often fail to prevent security breaches and are inconvenient for users. Proximia delivers a modern, **passwordless** solution that goes beyond static identity systems, integrating **biometric triggers, mutual trust, dynamic-proximity**, and **true persistence**, providing unmatched security and convenience for onsite and remote workforces.

Solve for Authentication with Proximia

sales@proximia.com | (844) GET-PROX or (844) 438-7769

Proximia integrates seamlessly with legacy systems, increases workforce productivity, and radically improves convenience

SEAMLESS INTEGRATION | LESS FRICTION | STREAMLINED ACCESS

In today's business landscape, secure authentication isn't just an option—it's a necessity. Safeguard your critical applications and data by securing every point of entry.

Don't leave your front door unlocked.

NO USERNAMES, NO PASSWORDS

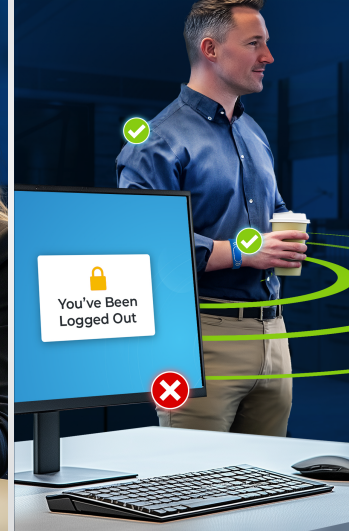

Biometric Triggers
for unforgeable
identifiers

Mutual Trust
between user
and device

Dynamic-Proximity
based on physical
nearness to device

Persistent Authentication
is always on guard

Proximia is versatile, offering cloud deployment, local installation, and flexible access via RDP, network, or offline modes.

ZERO TRUST ARCHITECTURE

The Proximia solution is built to meet the strict guidelines of ZTA and adheres the Cybersecurity and Infrastructure Security Agency (CISA) Maturity Model. Zero trust means trust nothing and verify everything, creating a digital fortress around your data.
