

PROXIMIA DEPLOYMENT FLEXIBILITY

Modern Authentication,
Wherever You Operate.

Modern Authentication, Wherever You Operate

In today's complex IT environments, authentication solutions must adapt—not the other way around. Proximia is built with flexibility at its core, offering seamless deployment across **cloud**, **on-premise**, and **hybrid environments**—so you can maintain security and convenience no matter your infrastructure.

Deploy Anywhere, Stay Secure Everywhere

Whether your systems live entirely in the cloud, within the walls of your datacenter, or in a hybrid model that bridges both, Proximia integrates securely and efficiently—without compromising performance or user experience.

Cloud-Ready

Deploy Proximia in your public or private cloud environment (AWS, Azure, Google Cloud, and more) for maximum scalability, modern access control, and minimal infrastructure overhead.

On-Premise Compatible

For industries with strict regulatory or operational requirements, Proximia offers full support for on-prem environments. Easily integrate with existing systems without major re-architecture.

Hybrid Environments

Many organizations operate in a hybrid world. Proximia bridges the gap—ensuring consistent, secure, and persistent authentication across distributed infrastructure.

Unified Security Across Legacy and Modern Systems

Proximia's architecture is designed to extend Zero Trust, passwordless authentication to both **modern applications and legacy systems**, delivering a consistent and secure user experience regardless of where or how your data is hosted.

- ✓ Proximity-based, persistent authentication
- ✓ Support for cloud-native and legacy systems
- ✓ No constant logins—frictionless access throughout the session
- ✓ Minimal user friction, maximum control for IT teams

How This Improves Operations

- ✓ Eliminate silos between environments
- ✓ Centralize and strengthen your security posture
- ✓ Simplify authentication without sacrificing control
- ✓ Meet compliance needs across regulated sectors

Ready for the Real World

Proximia was built for the reality most businesses face: a mixed environment with evolving needs. Our flexible deployment options let you **modernize your authentication today**—no matter where your infrastructure stands.
